WORK EXPERIENCE

Joyn - ProSiebenSat.1 Media SE

November 2024 - Present

Android Software Engineer

- Refactored legacy code and expanded Jetpack Compose adoption across core UI flows, reducing complexity and significantly cutting ANRs
- Delivered Android TV features end-to-end, collaborating with product, design, and QA from requirements through release, with a focus on remote-friendly navigation
- Strengthened test coverage with unit, integration, and screenshot tests to reduce regressions and improve release confidence
- Worked with observability and feature-flag tooling (Sentry, LaunchDarkly) to triage issues and support safe rollouts

Accedo.tv

December 2022 - November 2024

Android Software Engineer

- Contributed to large-scale streaming apps including 1001 and NBC Universal+, each serving 1M+ users across the Middle East and Latin America respectively, focusing on playback reliability and release quality
- Led Android release ownership on the NBCU project, covering technical decisions, code reviews, and release readiness, sustaining 99.8%+ crash-free sessions through monitoring, triage, and rapid fixes
- Designed and implemented server-side ad insertion (SSAI) and improved playback resiliency using ExoPlayer

Banco Inter

September 2021 - November 2022

Android Software Engineer

- Developed payment features for a digital bank with 30M+ users, including wire transfers and contactless payments via Google Wallet
- Integrated the Inter and Inter Companies super apps into a shared codebase using product flavors and build variants, lifting the Inter Companies app rating from 2.9 to 4.8 on Google Play
- Contributed to architecture and code quality across feature teams in a large Android codebase

Treinus

September 2019 - October 2020

Android Software Engineer

- Built Android features in Kotlin and Java for a sports-tech startup connecting athletes and consultants, working across MVC and VIPER architectures
- Improved CI/CD pipelines on Azure DevOps, automating build and Play Store release steps to reduce manual overhead

EDUCATION

Federal University of Minas Gerais (UFMG)

2018 - 2022

BSc in Computer Science

Federal Institute of Minas Gerais - Ponte Nova Campus

2015 - 2017

Computer Technician
